Blue Sky Uranium (“Blue Sky”) is a leader in uranium discovery in [Argentina](#). The Company’s objective is to deliver exceptional returns to shareholders

by delineating uranium resources in anticipation of a return to a positive uranium market. The Company holds 428,000

hectares of property located in two of the most prospective uranium provinces of Argentina.

Blue Sky’s flagship **Amarillo Grande Uranium-Vanadium Project** in the **Rio Negro Province** was an in-house discovery of a new district that has the potential to be among the first domestic suppliers of uranium to the growing Argentine market, as the largest generator of electricity from nuclear energy in South America.

The growth outlook for the Argentina nuclear industry—mandate is expected to more than double nuclear power usage by 2025.

On [February 27, 2019](#), **Blue Sky** reported an updated independent NI 43-101 compliant resource estimate of **22.7 million pounds U₃O₈** and **11.5 million pounds V₂O₅** for the **Ivana Deposit** at the **Amarillo Grande Uranium-Vanadium Project**. The resource estimate was based on 488 RC drill holes representing 8,792 metres drilling with one metre samples. The drilling was completed in two phases starting January 2017 and completed in September 2018.

The **Ivana mineral resource** is the first for the **Amarillo Grande Project**. The Ivana Deposit is situated within 5 properties of less than 7,000 hectares in total, covering the southern portion of the 145 km uranium-vanadium exploration trend, within which **Blue Sky** controls approximately 300,000 hectares of mineral rights.
