Notes to the Condensed Consolidated Interim Financial Statements For the nine months ended September 30, 2024 and 2023 (Unaudited - Expressed in Canadian Dollars Unless Otherwise Noted)

1. NATURE OF OPERATIONS AND GOING CONCERN

Blue Sky Uranium Corp. (the "Company") was incorporated under the Business Corporation Act of British Columbia on November 30, 2005 as Mulligan Capital Corp. On May 18, 2006, the Company received final receipts for a prospectus and became a reporting issuer in British Columbia and Alberta. On June 27, 2006 the Company completed its initial public offering and on June 28, 2006 the Company listed its common shares on the TSX Venture Exchange (the "TSX-V") as a capital pool company. On February 7, 2007, the Company completed its qualifying transaction and was upgraded to Tier II status on the TSX-V. The Company also changed its name to Blue Sky Uranium Corp. to reflect its business as a junior uranium exploration company. The address of the Company's registered office is Suite 411 – 837 West Hastings Street, Vancouver, BC, Canada V6C 3N6.

The Company is a natural resource company engaged in the acquisition and exploration of resource properties in Argentina. The Company's mineral property interests presently have no proven or probable reserves and, on the basis of information to date, it has not yet determined whether these properties contain economically recoverable resources. Consequently, the Company considers itself to be an exploration stage company.

The amounts shown as mineral property interests represent acquisition costs incurred to date, less amounts amortized and/or written off, and do not necessarily represent present or future values. The underlying value of the mineral property interests is entirely dependent on the existence of economically recoverable reserves, securing and maintaining title and beneficial interest in the properties, the ability of the Company to obtain the necessary financing to advance the properties beyond the exploration stage, and the future profitability of the properties.

These unaudited condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard ("IAS") 34 'Interim Financial Reporting' ("IAS 34") using accounting policies consistent with IFRS Accounting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). The accounting policies and methods of computation applied by the Company in these unaudited condensed consolidated interim financial statements are the same as those applied in the Company's annual consolidated financial statements for the year ended December 31, 2023.

The Company has experienced recurring operating losses and has an accumulated deficit of \$57,609,686 and shareholders' deficiency of \$150,862 at September 30, 2024. In addition, the Company has a negative working capital of \$424,531 at September 30, 2024 and negative cash flow from operating activities of \$2,550,677. Working capital is defined as current assets less current liabilities and provides a measure of the Company's ability to settle liabilities that are due within one year with assets that are also expected to be converted into cash within one year. These factors create material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern. The Company's continued operations, as intended, are dependent upon its ability to raise additional funding to meet its obligations and commitments and to attain profitable operations. Management's plan in this regard is to raise equity financing as required. There are no assurances that the Company will be successful in achieving these goals.

The Company's business may be affected by changes in political and market conditions, such as interest rates, availability of credit, inflation rates, changes in laws, and national and international circumstances. Recent geopolitical events, and potential economic global challenges such as the risk of higher inflation and energy crises, may create further uncertainty and risk with respect to the prospects of the Company's business.

These condensed consolidated interim financial statements do not include adjustments to the amounts and classifications of assets and liabilities and reported expenses that might be necessary should the Company be unable to continue as a going concern, which could be material.

Notes to the Condensed Consolidated Interim Financial Statements For the nine months ended September 30, 2024 and 2023 (Unaudited - Expressed in Canadian Dollars Unless Otherwise Noted)

2. MATERIAL ACCOUNTING POLICIES

Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting and using accounting policies in compliance with IFRS issued by the IASB, and accordingly, certain information and note disclosure included in the annual consolidated financial statements prepared in accordance with IFRS have been omitted or condensed. These condensed consolidated interim financial statements should be read in conjunction with the Company's December 31, 2023, audited annual financial statements.

Basis of preparation

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for financial instruments measured at fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Basis of consolidation

These condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned subsidiaries as follows:

	Place of Incorporation	Principal Activity
Blue Sky Uranium Holdings Corp.	BC, Canada	Holding company
Minera Cielo Azul S.A. (Argentina)	Argentina	Exploration company
Ivana Minerales S.A. (Argentina)	Argentina	Exploration company
Desarrollo de Inversiones S.A. (Argentina)	Argentina	Exploration company
Viento de Oro S.A. de C.V. (Mexico)	Mexico	Exploration company

Inter-company balances and transactions, including unrealized income and expenses arising from inter-company transactions, are eliminated in preparing the condensed consolidated interim financial statements.

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

Significant Accounting Estimates and Judgments

The preparation of these condensed consolidated interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates.

Notes to the Condensed Consolidated Interim Financial Statements For the nine months ended September 30, 2024 and 2023 (Unaudited - Expressed in Canadian Dollars Unless Otherwise Noted)

2. MATERIAL ACCOUNTING POLICIES (continued)

These condensed consolidated interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the condensed consolidated interim financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Critical accounting judgments

- i. Presentation of the condensed consolidated interim financial statements which assumes that the Company will continue in operation for the foreseeable future, obtain additional financing as required, and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due.
- ii. The analysis of the functional currency for each entity of the Company involves significant estimation and judgement by management. In concluding that the Canadian dollar is the functional currency of the parent and its subsidiary companies, management considered the currency that mainly influences the cost of providing goods and services in each jurisdiction in which the Company operates. As no single currency was clearly dominant the Company also considered secondary indicators including the currency in which funds from financing activities are denominated and the currency in which funds are retained.
- iii. The net carrying value of each mineral property is reviewed regularly for conditions that suggest impairment or a reversal of previously recorded impairment. This review requires significant judgment. Factors considered in the assessment of asset impairment include, but are not limited to, whether there has been a significant adverse change in the legal, regulatory, accessibility, title, environmental or political factors that could affect the property's value; whether there has been an accumulation of costs significantly in excess of the amounts originally expected for the property's acquisition, development or cost of holding; and whether exploration activities produced results that are not promising such that no more work is being planned in the foreseeable future. If impairment is determined to exist, a formal estimate of the recoverable amount is performed, and an impairment loss is recognized to the extent that the carrying amount exceeds the recoverable amount.

New and amended IFRS standards that are effective for the current period:

Amendments to IAS 1, Classification of Liabilities as Current or Non-current (effective January 1, 2024) provide a more general approach to the classification of liabilities based on the contractual arrangements in place at the reporting date. This amendment did not have any impact on the Company's consolidated financial statements.

New Accounting Standards and Interpretations not yet effective

The following new standards, amendments and interpretations have been issued but are not effective for the nine months ended September 30, 2024 and accordingly, they are not expected to have any impact and have not been applied in preparing these condensed consolidated interim financial statements.

Notes to the Condensed Consolidated Interim Financial Statements For the nine months ended September 30, 2024 and 2023 (Unaudited - Expressed in Canadian Dollars Unless Otherwise Noted)

2. MATERIAL ACCOUNTING POLICIES (continued)

Amendments to IAS 21, Lack of Exchangeability (effective January 1, 2025) requires companies to provide more useful information in their financial statements when a currency cannot be exchanged into another currency. The amendments respond to stakeholder feedback and concerns about diversity in practice in accounting for a lack of exchangeability between currencies. The amendments will help companies and investors by addressing a matter not previously covered in the accounting requirements for the effects of changes in foreign exchange rates. These amendments will require companies to apply a consistent approach in assessing whether a currency can be exchanged into another currency and when it cannot, in determining the exchange rate to use and the disclosures to provide.

IFRS 18, Presentation and Disclosure in Financial Statements introduces three sets of new requirements to give investors more transparent and comparable information about companies' financial performance for better investment decisions.

- i. Three defined categories for income and expenses—operating, investing and financing—to improve the structure of the income statement, and require all companies to provide new defined subtotals, including operating profit.
- ii. Requirement for companies to disclose explanations of management-defined performance measures (MPMs) that are related to the income statement.
- iii. Enhanced guidance on how to organize information and whether to provide it in the primary financial statements or in the notes.

This new standard is effective for reporting periods beginning on or after January 1, 2027.

3. MINERAL PROPERTY INTERESTS

The schedules below summarize the acquisition costs and all exploration expenditures incurred to date for each mineral property interest that the Company holds title to and is continuing to explore as at September 30, 2024:

Share Purchase Option Compensation Plan

The Company has a share purchase option plan (the "Plan") approved by the Company's shareholders that allows it to grant share purchase options, subject to regulatory terms and approval, to its officers, directors, employees and service providers for a maximum term of ten years. The Plan is based on the maximum number of eligible shares equaling a rolling percentage of 10% of the Company's outstanding common shares, calculated from time to time. If outstanding share purchase options are exercised or expire, and/or the number of issued and outstanding common shares of the Company increases, then the share purchase options available to grant under the Plan increase proportionately.

The exercise price of each share purchase option is set by the Board of Directors at the time of grant but cannot be less than the market price less allowable discounts in accordance with the policies of the TSX Venture Exchange. Share purchase options granted generally vest immediately, are subject to a four-month hold period and are generally exercisable for a period of ten years.

5. RELATED PARTY BALANCES AND TRANSACTIONS

Grosso Group Management Ltd.

On April 1, 2010, the Company entered into a Management Services Agreement ("Agreement") with Grosso Group Management Ltd. ("Grosso Group") to provide services and facilities to the Company. Grosso Group provides its member companies with administrative and management services. The member companies pay monthly fees to Grosso Group on a cost recovery basis. The fee is based upon a pro-rating of Grosso Group's costs including its staff and overhead costs among the member companies. The fee is reviewed and adjusted quarterly based on the level of services required. The Agreement expires on December 31, 2024 and is automatically renewed for a period of two years pursuant to the terms of the Agreement.

The Agreement contains termination and early termination fees in the event the services are terminated by the Company. The termination fee includes three months of compensation and any contractual obligations that Grosso Group undertook for the Company, up to a maximum of \$750,000. The early termination fees are the aggregate of the termination fee in addition to the lesser of the monthly fees calculated to the end of the term and the monthly fees calculated for eighteen months, up to a maximum of \$1,000,000.

6. BASIC AND DILUTED LOSS PER SHARE

The calculation of basic and diluted loss per share for the nine months ended September 30, 2024, and 2023 was based on the following:

	Three months ended September 30,		Nine months ended September 30,	
	2024	2023	2024	2023
Loss attributable to common shareholders (\$)	998,127	700,426	2,599,996	2,665,344

7. MARKETABLE SECURITIES

From time to time, the Company may acquire and transfer marketable to facilitate intragroup funding transfers between the Canadian parent and its Argentine operating subsidiaries. The Company does not acquire marketable securities and engage in these transactions for speculative purposes. In this regard, under this strategy, the Company generally uses marketable securities of large and well-established companies with high trading volumes and low volatility. Nonetheless, as the process to acquire, transfer and ultimately sell the marketable securities occurs over several days, some fluctuations are unavoidable. As the marketable securities are acquired with the intention of a near term sale, they are considered financial instruments that are held for trading, all changes in the fair value of the instruments between acquisition and disposition are recognized through profit or loss. The subsequent disposition of these marketable securities in exchange for Argentine pesos gave rise to a gain as the amount received in Argentine peso exceeds the amount of Argentine peso the Company would have received from a direct foreign currency exchange.

As a result of having utilized this mechanism for intragroup funding for the nine months ended September 30, 2024, the Company realized a gain of \$232,305 (September 30, 2023 – \$638,770) from the favorable foreign currency impact. During the nine months ended September 30, 2024, the Company also realized a gain of \$24,334 (September 30, 2023 – \$Nil) as a result of an increase in value of its marketable securities investments.

8. OPERATING SEGMENTS

The Company is primarily involved in mineral exploration activities in Argentina. The Company is in the exploration stage and, accordingly, has no reportable segment revenues or operating revenues for the nine months ended September 30, 2024.

The Company's total non-current assets are segmented geographically as follows:

9. COMMITMENTS

Proposed Transaction

Effective June 6, 2024, the Company entered into a binding term sheet with Corredor Americano S.A. ("COAM"), an Argentine company of the Corporación América Group, to complete an option agreement (the "Proposed Transaction") in respect to the Company's Ivana Uranium-Vanadium Deposit (the "Deposit", see also Note 3).

The Proposed Transaction will see the Deposit brought to completion of the feasibility phase in exchange for a 50% interest in the Deposit. This includes expenditures of up to US\$35,000,000, and exploration and drilling of key exploration targets located in adjacent areas. The Company has incorporated Ivana Minerales S.A. in Argentina to serve as a joint venture company ("JVCO") for the Proposed Transaction that will be governed by a shareholders' agreement. If COAM proceeds with taking the Deposit to production, the Company will receive a free carry on the estimated capital costs in exchange for COAM earning an additional 30% interest in JVCO resulting in COAM holding an 80% interest and the Company holding a 20% interest in JVCO.

Under the Proposed Transaction, the Company and JVCO will enter into a call option agreement which, among other things, will provide JVCO with the right to conduct exploration and drilling activities on certain prospective areas and exploration targets (the "Exploration Targets") and a five year option to acquire the Exploration Targets (the "Call Option") at a price determined by reference to the amount and type of resources and reserves in respect of such properties at the time of exercise of the Call Option, as verified by a technical report prepared in accordance with National Instrument 43-101 – *Standards for Disclosure for Mineral Projects*.

The parties agreed to a period of 90 days to negotiate in good faith definitive agreements (the "Definitive Agreements") in connection with the Proposed Transaction. The obligations to enter into Definitive Agreements remains subject to various conditions, including but not limited to, COAM completing its due diligence and the parties having agreed on the final forms of Definitive Agreements. Accordingly, there can be no assurance that the Definitive Agreements will be entered into nor that the Proposed Transaction will be completed on the terms described above or at all. Completion of the Proposed Transaction will be subject to the terms and conditions of the Definitive Agreements, including obtaining the approval of the TSX-V and the Company's shareholder approval.

Financial Advisory Services Agreement

On August 1, 2023, the Company entered into an agreement with ACP Capital Markets LLC ("ACP") to provide financial advisory services. In consideration for the services, the Company has paid US\$50,000, and a progress fee of US\$50,000 is payable on the date of letter of intent. Upon closing of a transaction with a purchaser identified by ACP, the Company shall pay a success fee of 2.5% of the consideration received no less than US\$450,000. The Company and ACP are unrelated and unaffiliated entities. The agreement remains in effect until terminated by one of the parties. The success fee is also payable to ACP in the event of closing of a transaction within 12 months after termination of this agreement.

Notes to the Condensed Consolidated Interim Financial Statements For the nine months ended September 30, 2024 and 2023 (Unaudited - Expressed in Canadian Dollars Unless Otherwise Noted)

9. COMMITMENTS (continued)

On September 20, 2023, the Company entered into an agreement with Yaderay S.A. ("SCP") to provide financial advisory services for a term of 12 months. The Company and SCP are unrelated and unaffiliated entities. In consideration for the services, the Company shall pay 5% of the gross proceeds received from purchasers identified by SCP, subject to TSX-V approval.

The Company has engaged ACP and SCP as joint financial advisors in connection with the Proposed Transaction.

Management Services Agreement

Grosso Group provides its member companies with administrative and management services. The member companies pay monthly fees to Grosso Group on a cost recovery basis. The fee is based upon a pro-rating of Grosso Group's costs including its staff and overhead costs among the member companies. The current fee is \$1,000 per month. This fee is reviewed and adjusted quarterly based on the level of services required.

The table below represents the Company's aggregate commitment to Grosso Group over the term of the Management Services Agreement.

The Company thoroughly examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks. These risks may include credit risk, liquidity risk, currency risk, and interest rate risk. Where material, these risks are reviewed and monitored by the Board of Directors.

(a) Fair Values

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

12. FINANCIAL INSTRUMENTS AND CAPITAL MANAGEMENT (continued)

The Company's financial instruments consist of cash and cash equivalents, marketable securities, and accounts payable and accrued liabilities. Marketable securities are measured at fair value through profit or loss using level 1 inputs.

(b) Financial Instrument Risk Exposure

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash and cash equivalents. The Company has reduced its credit risk by depositing its cash and short-term investments with financial institutions that operate globally. Therefore, the Company is not exposed to significant credit risk and the Company's overall credit risk has not changed significantly from the prior period.

Liquidity risk

Liquidity risk is the risk that the company will not be able to meet its financial obligations as they fall due. The Company has in place a planning and budgeting process to help determine the funds required to ensure the Company has the appropriate liquidity to meet its operating and growth objectives. The Company has historically relied on issuance of shares and warrants to fund exploration programs and may require doing so again in the future. See Note 1 for further information.

Market risk

(i) Currency risk

Financial instruments that impact the Company's net earnings due to currency fluctuations include: cash, and accounts payable all denominated in United States dollars and Argentinean pesos. A 10% change in US dollar and the Argentinean peso exchange rates relative to Canadian dollar would have insignificant impact on the Company's net loss:

- A 10% change in the US dollar exchange rate relative to the Canadian dollar would change the Company's net loss by approximately \$7,000.
- A 10% change in the Argentinean peso exchange rate relative to the Canadian dollar would change the Company's net loss by approximately \$8,000.

(ii) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The fair value of cash and cash equivalents approximates its carrying value due to the immediate or short-term maturity of this financial instrument. Other current financial assets and liabilities are not exposed to interest rate risk because they are non-interest bearing or have prescribed interest rates.

12. FINANCIAL INSTRUMENTS AND CAPITAL MANAGEMENT (continued)

(c) Capital Management

The Company's objectives of capital management are intended to safeguard the entity's ability to support the Company's normal operating requirements on an ongoing basis, continue the development and exploration of its mineral properties and support any expansionary plans. The capital structure of the Company consists of equity attributable to common shareholders, comprised of issued capital, reserves and deficit. The Company manages the capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the Company's assets.

To effectively manage the entity's capital requirements, the Company has in place a planning and budgeting process to help determine the funds required to ensure the Company has the appropriate liquidity to meet its operating and growth objectives. The Company has historically relied on issuance of shares to develop its mineral projects and may require doing so again in the future. The Company is monitoring market conditions to secure funding at the lowest cost of capital. The Company is exposed to various funding and market risks which could curtail its access to funds. The Company is not subject to any external covenants. There were no changes in the Company's approach to capital management during the nine months ended September 30, 2024.
