NEWS RELEASE – January 15, 2025

Blue Sky Uranium Corporate Update

Vancouver, BC / CNW / January 15, 2025 / Blue Sky Uranium Corp. (TSX-V: BSK, FSE: MAL2; OTC: BKUCF), ("Blue Sky" or the "Company") is pleased to provide an update on corporate activities and outlook for 2025. Last year was a pivotal one for the Company, with several major milestones reached, including: a positive new Preliminary Economic Assessment ("PEA") for the Ivana deposit at the flagship Amarillo Grande project; a strategic partnership and definitive earn-in agreement with Abatare Spain, S.L.U. ("COAM") to facilitate advancing Ivana through feasibility and potentially commercial production; and, a new initiative to explore for in-situ recovery uranium targets, including two project acquisitions with significant potential for discovery.

In 2025, the Company will continue to build on its momentum, starting with the planned Special Meeting of Shareholders to approve the earn-in agreement with COAM. Once approved, the joint venture will resume the detailed engineering and other work required to complete a pre-feasibility study of the Ivana deposit. In order to provide continuity with previous work and to oversee Blue's Sky's interest, the Company is rearranging internal positions to allow the formation of the future technical committees within the joint venture with COAM. To this effect, Blue Sky reports that Guillermo Pensado has agreed to serve as the Company's Technical Consultant for the joint venture and will relinquish his role as Vice President, Exploration and Development. In this new role, he will focus on the proposed advancement of the Ivana deposit as well as the other exploration activities associated with the COAM agreement.

Nikolaos Cacos, President & CEO of the Company stated, *"Since 2016, Guillermo has been a key driver of discovery at Amarillo Grande, and has overseen all aspects of advancing the Ivana deposit. We are pleased to now have him in this very important role, where his expertise and continued enthusiasm for the deposit, the project and exploration in Argentina will help ensure the success of the joint venture."*

Mr. Cacos continued, *"The endorsements for doing business in Argentina right now are wide-spread, and we are also seeing that reflected in the market. As early and consistent champions of exploring in Argentina, we are pleased to see this support, and look forward to creating strong news flow as we make strides on all of our projects in 2025."*

Blue Sky continues exploration-related activities at its Corcovo and Chihuidos projects. Permitting for fieldwork remains in progress, and desktop studies are on-going in order to identify and hone targets that will be ready for detailed ground work when permits are issued. Additional programs this year may include regional exploration at Amarillo Grande.

Qualified Persons

The technical contents of this news release have been reviewed and approved by Dr. David Terry, Ph.D., P. Geo. Dr. Terry is a Director of the Company and a Qualified Person as defined in National Instrument 43-101.

About Blue Sky Uranium Corp.

Blue Sky Uranium Corp. is a leader in uranium discovery in Argentina. The Company's objective is to deliver exceptional returns to shareholders by rapidly advancing a portfolio of surficial uranium deposits into low-cost producers, while respecting the environment, the communities, and the cultures in all the areas in which we work. Blue Sky has the exclusive right to properties in two provinces in Argentina. The Company's flagship Amarillo Grande Project was an in-house discovery of a new district that has the potential to be both a leading domestic supplier of uranium to the growing Argentine market and a new international market supplier. The Company is a

member of the Grosso Group, a resource management group that has pioneered exploration in Argentina since 1993.
