OTC: BKUCF  
FSE: MAL2

**Blue Sky  
Uranium  
Corp.**

Exploring and Developing  
the World's Newest  
Uranium/Vanadium District

### QUICK FACTS

**PEOPLE:** Best-in-class management and technical team with proven prospect development success in Argentina

**VALUE:** Largest NI 43-101 Uranium resource in Argentina, with positive PEA & major partner earn-in funding advancement to potential production

**UPSIDE:** Active exploration drill programs underway to identify new resources + target generation program at new ISR projects

### SHARE STRUCTURE

(as of February 13, 2026)

|               |             |
|---------------|-------------|
| Issued        | 434,231,166 |
| Warrants      | 237,332,918 |
| Options       | 29,250,000  |
| Fully Diluted | 700,814,084 |

### APRIL 2026

#### DIRECTORS/MANAGEMENT:

Joseph Grosso  
Director Emeritus  
Nikolaos Cacos, M.I.M.  
President & CEO, Director  
Darren C. Urquhart, C.A.  
CFO  
David A. Terry, PhD., P. Geo,  
Director  
Martin Burian, ICD.D, CPA  
Director  
Pompeyo Gallardo  
VP Corporate Development  
Connie Norman  
Corporate Secretary  
Guillermo Pensado, M.Sc. CPG  
Technical Consultant

### Preliminary Economic Assessment for the Ivana Deposit, Amarillo Grande Project

(See News release February 22, 2024)

#### Economic Highlights (USD, After-tax)

|                 | Base Case<br>U <sub>3</sub> O <sub>8</sub> \$75/lb | Spot Case<br>U <sub>3</sub> O <sub>8</sub> \$105/lb |
|-----------------|--|---|
| <b>NPV (8%)</b> | <b>\$227.7</b>                                     | <b>\$418.3</b>                                      |
| <b>IRR</b>      | <b>38.9%</b>                                       | <b>57.0%</b>  |
| <b>Payback</b>  | <b>1.9 years</b>                                   | <b>1.3 years</b>                                    |

PEA is preliminary in nature and is intended to provide an initial assessment of the project's economic potential and development options. The PEA mine schedule and economic assessment includes numerous assumptions and is based on both Indicated and Inferred mineral resources. Inferred resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the PEA results will be realized. Mineral resources are not mineral reserves and do not have demonstrated economic viability. Additional exploration will be required to potentially up grade the classification of the inferred mineral resources to be considered in future advanced studies.

## AMARILLO GRANDE PROJECT

The district-scale Amarillo Grande Project in Rio Negro province is an excellent candidate to be the first low-cost, domestic uranium supplier to the growing Argentine nuclear market.

An earn-in joint venture with COAM sets a clear path to production at Ivana, with no funding by BSK now through development, as well as exploration underway at key targets. (See [News Release 12/2/24](#))

## Programs at Ivana Fully Funded by Strategic Joint-Venture

- Path to bring Ivana deposit to feasibility established and work underway
  - Infill drill program at Ivana deposit successfully completed; new higher-grade zone identified that may contribute to increased tonnage and improved economics in future resource estimate/economic study
- New diamond drilling programs underway at high-priority targets less than 10km from Ivana Deposit, including Ivana Gateway (~1,200m completed) and Ivana East (up to 1,200m underway).

### Mineral Resource Statement for Ivana Deposit, Amarillo Grande Project. (100 ppm Uranium Cut-off) (Refer to the News Release dated 02/22/24 for full details.)

| Class     | Tonnes (Mt) | Average Grade |                                   |         |                                   | Contained Metal                     |                                     |
|-----------|-------------|---------------|-----------------------------------|---------|-----------------------------------|-------------------------------------|-------------------------------------|
|           |             | U (ppm)       | U <sub>3</sub> O <sub>8</sub> (%) | V (ppm) | V <sub>2</sub> O <sub>5</sub> (%) | U <sub>3</sub> O <sub>8</sub> (Mlb) | V <sub>2</sub> O <sub>5</sub> (Mlb) |
| Indicated | 19.7        | 333           | 0.039                             | 105     | 0.019                             | 17.0                                | 8.1                                 |
| Inferred  | 5.6         | 262           | 0.031                             | 109     | 0.019                             | 3.8                                 | 2.4                                 |

### PEA Cost Highlights (USD)

|   |  |
|---|--|
| Pre-production Capital Cost incl. \$35.4M contingency | \$159.7M                                 |
| LOM Sustaining Capital Cost incl. \$5.4M contingency  | \$27.3M                                  |
| Average LOM Total Cash Cost net of credits:           | \$23.29/lb U <sub>3</sub> O <sub>8</sub> |
| Average LOM All-In Sustaining Costs net of credits:   | \$24.95/lb U <sub>3</sub> O <sub>8</sub> |

### PEA Key Assumptions & Inputs

|   |  |
|---|--|
| Uranium Price                                       | \$75/lb U <sub>3</sub> O <sub>8</sub>    |
| Vanadium Price                                      | \$7.5/lb V <sub>2</sub> O <sub>5</sub>   |
| Years of Construction                               | 2  |
| Years of Full production:                           | 11                                       |
| Strip Ratio (waste/ore):                            | 1.5:1                                    |
| Dilution:   | 3%                                       |
| Average Mining rate (waste + mineralized material): | 5.10 Mtpa                                |
| Processing throughput:                              | 2.17 Mtpa                                |
| Process Plant Recoveries                            | Uranium: 84.6%,<br>Vanadium: 52.5%       |
| Average Annual Production (LOM):                    | 1.5 Mlbs/a U <sub>3</sub> O <sub>8</sub> |
| LOM uranium production:                             | 16.5 Mlbs U <sub>3</sub> O <sub>8</sub>  |

## Uranium Demand Forecast Supports Accelerated Exploration
